

ASP FACTS

PRODUCT: Tri-Fold® Ring

ADVANTAGE:

Tri-Fold Rings are light, compact and reusable. They provide a convenient means to carry multiple Tri-Folds on a Carabiner. The Ring provides rapid removal of Tri-Folds from a case. Grasping the outside of the Ring between the index and middle finger allows Tri-Folds to be rapidly secured during restraint of a subject.

SPECIFICATION:

- Black polymer
- Integral carry loop
- Eccentric retention posts
- Domed insertion heads
- Reusable design

PERFORMANCE:

Combined with the Tri-Fold, the Ring is the most compact, easily carried, rapidly applied restraint system on the market. The strength, convenience and ease of application are unmatched by any available disposable restraint.

SALES STRATEGY:

Demonstrate the ease of attaching and carrying the Ring and a Tri-Fold Restraint. Show the speed with which a Tri-Fold can be applied and the Ring disconnected from a restrained subject.
