

ASP FACTS

FEATURE: Inset Stitch Case

ADVANTAGE:

The amount of equipment carried by police personnel has created a need for lighter, more compact cases. By eliminating the outside flange of traditional sewn cases, inset stitch construction minimizes the space required to accommodate a case on the duty belt. In addition, the design offers a clean appearance and strong design.

SPECIFICATION:

- Finished edges
- No edge flange
- Inset back panel
- Compact construction
- Clean appearance
- Black, Basketweave, Ballistic, ASPtec® finishes
- Reinforced belt slot

PERFORMANCE:

Inset stitch cases provide additional room on the duty belt for the myriad of specialized equipment carried in the modern law enforcement environment. The compact design presents a clean, yet highly functional appearance.

SALES STRATEGY:

Show the additional belt space and clean appearance made possible by the absence of a flange on inset stitch cases.
